

Development Team Handoff

Status: Planning complete — implementation starts here.

Primary brief: [Shyara Digital - Studio Editor Developer Brief.docx](#) (v1.1)

Research: [RESEARCH.md](#)

The planning agent did **not** ship application code, Supabase migrations, or deployments. This document scopes what engineering must build.

Launch blocker

All three v1 animation handlers must visually match `Sample Engagement Invitation 1.mp4` before adding templates to the public catalog:

- `fade_writing_element`
- `skate_writing_rtl`
- `burst_writing_enter`

Suggested build order

1. **Foundation** — Staging + production Supabase; schema (`platform_settings`, templates, versions, entitlements, `render_jobs`); Fastify API + admin RBAC; storage buckets.
2. **animation-engine** — `packages/animation-engine`; unit tests at fixed `t_ms`; grapheme-based writing reveal.
3. **MVP assets** — Engagement Sample 1 `definition_json`; fonts; 4K + 1080p background MP4s.
4. **Studio UI** — `/studio/:templateId`; click-to-edit; engine-driven DOM overlays; pay gate.
5. **Payments** — Razorpay (staging test keys); webhooks; entitlements + download quota.
6. **Render worker** — BullMQ; Docker with FFmpeg + node-canvas; quality presets; login-gated download.
7. **Admin v1** — Catalog, JSON editor, coupons, orders, render jobs, manual fulfillment.
8. **QA** — [FOUNDER QA CHECKLIST.md](#)

Core packages / routes (suggested layout)

```
packages/animation-engine/ frontend/src/features/studio/ frontend/src/features/admin/  
backend/ # Fastify API worker/ # Render service
```

Definition of done (MVP)

- ☐ Pay-first: /studio blocked without entitlement
- ☐ Click-to-edit with frozen animation during edit
- ☐ Page 1 (0–6s) not editable
- ☐ Export 4K / 2K / 1080p / WhatsApp preset at 60fps
- ☐ Preview and export pass golden-frame comparison
- ☐ Admin controls prices, templates, JSON — no hardcoded catalog in React
- ☐ Staging E2E with Razorpay test mode before production keys

Out of scope for MVP

Canva API, general NLE, user photos in studio, animated PDF editor, international payments.
